Helicopter Landing Officer

Introduction

The course aims to provide the knowledge and skills to function effectively and safely as a Helicopter Landing Officer (HLO) at installations in accordance with current industry standards.

Target Audience

All Personnel designated as HLO's and supervisor / senior operational personnel.

Course Syllabus:

This course consists of a series of theory presentations followed by practical demonstrations and candidate participation.

By the end of the program, participants will have acquired competence in the theory and practice of the following:

- Transmit and receive radio messages between the helicopter and platform
- Advise the helicopter pilot of weather, wind and sea conditions on site
- Understanding of helideck operations and safety requirements/procedures (as per ICAO Standards)
- Ascertain and advise the helicopter pilot as to whether safety requirements related to aircraft operations have been adhered to
- Supervise the movements of passengers, baggage and cargo to and from helicopter
- Familiarity with different helicopter types and their operation and emergency procedures
- Advise shore stations of helicopter movements, estimated time of arrival (ETA), estimated time of departure (ETD) and manifest details
- Ensuring adequate fire protection is provided for each take off and landing
- Familiarity with management of dangerous good (DC).
- Helicopter refueling and procedures (offshore)
- Basic marshalling signals
- Shutdown and security of aircraft on helideck
- "Hot" refueling procedures
- Ensuring that the platform meets the safety requirements for helicopter operations (ie. crane/s secured)
- Introduction to specialized operations (Search and Rescue, winching, medivac, night operations)

Competency

Satisfactory completion of the written and practical assessment elements is a prerequisite for successful award of certification.
