H₂S Awareness

Introduction

The course aims to provide an understanding of the hazards associated with Hydrogen Sulfide (H₂S) and the confidence to enable personnel to work safely in a potential H₂S environment.

Target Audience

All personnel who may work in a zone where the potential for H₂S release has been identified.

Course Syllabus:

This course consists of a series of theory presentations followed by practical demonstrations and candidate participation.

By the end of the program, participants will have acquired competence in the theory and practice of the following:

- Properties and Hazards of H₂S
- Biological effects of H₂S
- H₂S Gas Monitoring Systems and Alarm Systems
- Contingency Plans - Muster / Safe Haven locations
- Basic Expired Air Resuscitation (EAR)/ Life Support
- Breathing Apparatus / escape breathers familiarization
- Portable Gas Monitors

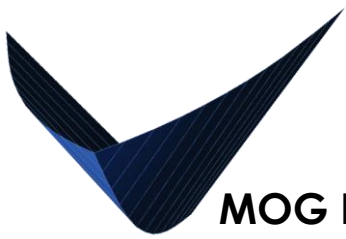

Competency

Satisfactory completion of the written and practical assessment elements is a prerequisite for successful award of certification.
