

Duration: 1 day – Theory and Practical
Course Size: Minimum – 6 /Maximum – 10 (participants)
Language: This course is presented in English
Price 50,000 Baht Lump Sum (Not including Vat 7%)

Course Overview

The course aims to provide knowledge and skill necessary to operate an overhead gantry crane in a safe and efficient manner.

Who Should Attend

All personnel who operate overhead gantry cranes

Learning Outcomes

By the end of the program, participants will have the skills and knowledge to identify, list, describe and/or demonstrate:

- An outline of the requirements for crane operations including personal and worksite safety;
- The use of pre start checks in an efficient, thorough and competent manner;
- An ability to identify potentially unsafe defects on the crane and report them;
- The use of pre operations checks in an efficient, thorough and competent manner;
- An ability to use, inspect and maintain the operational safety features built into the crane;
- An understanding of capacities, maximum loads;
- An ability (both practical and theoretical) to be able to conduct crane operations safely and efficiently in all conditions.
- An understanding and practical knowledge of lifting and lowering loads;
- The use of post operations checks in an efficient, thorough and competent manner;
- An understanding of the particular model crane in operation and its primary features / construction
- A knowledge of and the ability to carry out basic maintenance on the crane, including requirements for statutory inspections / certification and manufacturer's periodic / planned maintenance;
