

## **OIM Controlling Emergencies OPITO Accredited**

### **Target Group**

This assessment program is designed for Offshore Installation Managers (OIM). Superintendents or Person in Charge (PIC) who are designated as Incident Managers in Controlling Emergencies on Offshore Installations.

### **Course Objectives**

To review documentary evidence sufficient for the OPITO standard in:

Element 1.1 – Maintain a State of Readiness

To assess through practical simulation the OPITO standard in:

Element 1.2 – Assess the Situation and Take Effective Action

Element 1.3 – Maintain Communications

Element 1.4 – Delegate Authority to Act

Element 1.5 – Manage Individual and Team Performance

Element 1.6 – Deal with Stress in Self and Others

### **Course Outline**

A minimum of 3 emergency scenarios should take place to ensure the standards of performance are covered. Each should be based around a major incident chosen from:

- Well Control Incident
- Explosion and Fire
- Accommodation Fire
- Helicopter Incident
- Pipeline Incident
- Collision or wave damage causing structural collapse
- Loss of Stability (Mobile installations)

Each of the exercises will have a level of difficulty, assessors will observe the exercises and gather raw evidence on the candidate's performance, this evidence will then be converted into specific comments, recommendation and ratings against each performance criteria, and the exercise as a whole.

### **Course Duration**

3 Days

### **Pre Course Requirement**

Attendees should hold the position of Offshore Installation Manager, Deputy Offshore Installation Manager, Relief Offshore Installation Manager or designated to hold these positions dependant on assessment outcome and prior learning achievements, it is preferred that all attendees have attended an introduction to Major Emergency Management course previously. Sufficient additional personnel need to attend to facilitate other key members of the control room make up.
