Course Overview

This course is designed for personnel who supervise work within Confined Spaces.

The training programme involves both classroom presentations as well as a high degree of hands-on scenarios that will require attendees to actively participate in confined space and rescue applications

Standard of Training

MOG Industry Training (MOGIT) is approved by the Department of Labour Protection & Welfare (Royal Thai Ministry of Labour) for the delivery of training programmes on Occupational Safety in Confined Work Areas.

Our Confined Space Training programmes comply with the standards stated in The Department of Labour Protection and Welfare Memorandum on Criteria, Methods and Curriculum for Training on Occupational Safety in Confined Work Areas.

Training Programme

- 1) Definitions, types and kinds of confined areas.
- 2) Laws regarding safety for working in confined areas.
- 3) The roles, duties and responsibilities of Controllers.
- 4) The dangers of confined areas.
- 5) Planning for operations and prevention of potential dangers incurred by working in confined areas.
- 6) Assessment of the working conditions and preparedness for working in confined areas.
- 7) Correct and safe operational methods for confined areas.
- 8) The system for requesting permission to work in confined areas and cancellation of approval.
- 9) Orders for temporary suspension of work.
- 10) Techniques for inspecting the atmospheric conditions of confined areas.
- 11) Ventilation techniques.
- 12) Personal safety protection equipment used in confined areas.
