

OPITO Approved

Basic Offshore Safety Induction & Emergency Training (BOSIET with EBS)

OPITO Standard Code 5700

Period	3 Days Theory and Practical
Min / Max Class Sizes	4 / 16
Registration Fee	34,200 THB + VAT @ 7%
Venues	Laem Chabang (near Pattaya), or Songkhla, South Thailand
Certificate	OPITO (Standard Code 5700)
Validity	4 Years
Accommodation	Optional & additional – many choices available
Meals and Breaks	Included
Pre-Requisites	Validated Medical Certificate
Schedule	Every Monday and Wednesday

Course Description

Oil and Gas companies worldwide seek to ensure that everyone travelling to one of their offshore assets (production platform, drill rig, FPSO etc.) must have completed an appropriate offshore safety and emergency training course before being allowed to travel to their offshore asset.

The OPITO-approved BOSIET (Basic Offshore Safety Induction and Emergency Training) with Emergency Breathing System (EBS) course provides the delegate with a range of knowledge and skills relevant to travelling offshore by helicopter and working offshore, including safety induction, fire safety and basic firefighting; first aid; helicopter safety and escape using an EBS; and survival at sea.

Upon completion of the course the delegate will have an awareness of the generic hazards and associated risks encountered when working on offshore installations and the generic safety regimes and safety management systems in place to control and mitigate risks associated with hazards.

The BOSIET (with EBS) will also equip participants with the knowledge, skills and confidence to respond appropriately in the event of an offshore emergency and to enhance their survivability through proper use of emergency equipment and procedures.

Who Should Attend?

This training programme is designed to meet the initial offshore safety and emergency response training requirements for personnel new (or returning) to the offshore oil and gas industry who will be supplied with a rebreather emergency breathing system (EBS) during offshore helicopter travel.

Physical and Stressful Demands

Training and/or assessment activities contained within this Standard may include physically demanding and potentially stressful elements. All personnel who participate in such activities must be physically and mentally capable of participating fully.

Aim and Objectives

The aim of the BOSIET (with EBS) is to introduce delegates to the specific safety issues and regimes relevant to offshore installations, and to equip them with the basic emergency response knowledge and skills for travelling to and from offshore installations by helicopter.

The objectives of the BOSIET (with EBS) Training are that delegates will be able to:

- a) Identify the generic hazards which are specific to offshore oil and gas installations, potential risks associated with those hazards, and how controls are put in place to eliminate or reduce risks.
- b) Identify key offshore related safety regulations and explain the basic safety management concepts
- c) Demonstrate, in a simulated environment, that they can use the safety equipment, and follow procedures in preparing for, and during helicopter emergencies – with particular focus on escaping from a helicopter following ditching
- d) Demonstrate sea survival and first aid techniques
- e) Demonstrate that they can effectively use basic firefighting equipment, and practise self-rescue techniques in low visibility situations, to include smoke filled areas.

Curriculum

The training course consists of the following modules and elements:

Module 1 Safety Induction

- Element 1.1 Industry and Installation Overview
- Element 1.2 Offshore Hazards
- Element 1.3 Managing Offshore Safety
- Element 1.4 Controlling Offshore Hazards
- Element 1.5 Regulating Offshore Safety
- Element 1.6 Living and Working Offshore

Module 2 Helicopter Safety and Escape

- Element 2.1 Helicopter Travel
- Element 2.2 Helicopter Emergencies

Module 3 Sea Survival and First Aid

- Element 3.1 Evacuation
- Element 3.2 Emergency First Aid

Module 4 Firefighting and Self Rescue

- Element 4.1 Firefighting Offshore
- Element 4.2 Self-Rescue
