

OPITO Approved Further Offshore Emergency Training (FOET with EBS) OPITO Standard Code 5858

Period	1 Day Theory and Practical
Min / Max Class Sizes	4 / 16
Registration Fee	26,100 THB + VAT @ 7%
Venues	Laem Chabang (near Pattaya), or Songkhla, South Thailand
Certificate	OPITO (Standard Code 5858)
Validity	4 Years
Accommodation	Optional & additional – many choices available
Meals and Breaks	Included
Pre-Requisites	Validated Medical Certificate. A valid (in-date) OPITO-approved BOSIET (with CA-EBS), BOSIET, TBOSIET, FOET (with CA-EBS), FOET or TFOET certificate.
Schedule	Every Monday, Wednesday and Friday

Course Description

OPITO FOET (Further Offshore Emergency Training) is the refresher course of the OPITO BOSIET. This training course is designed in order to refresh the theoretical and practical knowledge gained during the BOSIET. Main disciplines are basic safety, basic medical knowledge, survival at sea and firefighting.

Who Should Attend?

This program is designed to meet the further onshore safety and emergency response training and assessment requirements for personnel working in the offshore oil and gas industry. who will be supplied with a rebreather emergency breathing system (EBS) during offshore helicopter travel.

Physical and Stressful Demands

Training and/or assessment activities contained within this Standard may include physically demanding and potentially stressful elements. All personnel who participate in such activities must be physically and mentally capable of participating fully.

Aim and Objectives

The aim of the FOET (with EBS) is to provide the delegates with the opportunity to practise and demonstrate emergency response skills which are not possible to practise during drills, exercises and emergency training offshore.

The objectives of the FOET (with EBS) are that delegates will be able to:

- a. Demonstrate, in a simulated environment, that they can use the safety equipment and follow procedures in preparing for and during helicopter emergencies – with particular focus on escaping from a helicopter following ditching.
- b. Demonstrate that they can use basic firefighting equipment effectively, and use self-rescue techniques in low visibility and completely obscured visibility situations e.g. smoke filled areas.
- c. Demonstrate that they can perform basic first aid.

Curriculum

The training course consists of the following modules and elements:

Module 5 Helicopter Safety and Escape

Element 5.1 Helicopter safety and escape techniques

Module 6 Firefighting and Self Rescue

Element 6.1 Basic firefighting and self-rescue techniques

Module 7 Emergency First Aid

Element 7.1 Emergency first aid techniques
